RP002-A1

RP003-A1

RP003-B1

RP102-A1
(Additional feature of wobble anvil and quick release anvil)

RP104-A1

- An optimized gear ratio and airflow for extra performance.
- Advanced & durable head design provides dramatically longer life.
- Fast run-down to speed-up tightening operations.
- Easy speed control throughout range.
- Soft grip provides superior comfort and non-slip feel for operation.
- Compact and light weight, ideal for confined working conditions.

APPLICATION:

Installation and repair of exhaust systems, radiators, water pumps, fuel pumps, transmissions, under-dashboard work, small engine repair, all small fasteners, etc.
